SmoothGLO®

BY LUMENIS

YOUR SKIN.
YOUR GLOW.

AI-generated image for illustrative purposes

VISIBLE TRANSFORMATION. **NATURALLY YOU.**

Your skin is more than what you see on the surface. If you notice:

- Redness
- Sun spots
- Fine lines
- Uneven tone
- Rough texture
- Loss of firmness
- Enlarged-looking pores

SmoothGLO
may be right for you

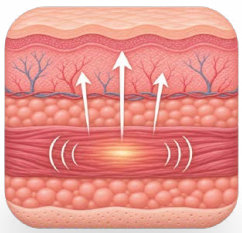

TRIGGER YOUR SKIN'S NATURAL RENEWAL RESPONSE.

Tone + Texture. One complete skin transformation.

THE **POWER** IN THE SEQUENCE.

SmoothGlo brings together three complementary technologies to address more than one aspect of **skin quality at once**

1. TONE with XPL

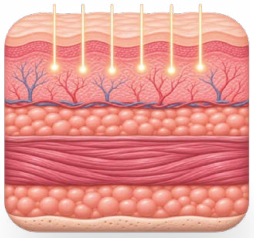

Light targets the appearance of visible reds, browns and uneven pigmentation.

2. TEXTURE with FibroBoost

RF microneedling supports dermal remodeling to improve the appearance of texture, pores, fine lines and firmness.

3. THE RESULT

More defined-looking facial contours. More even-looking skin tone. Smoother-looking texture. Firmer-looking skin.

WANT TO TAKE IT FURTHER?
SmothGlo ENHANCED™

Ladding triLIFT Lift Mode™ for an additional layer of treatment focused on facial structure & lift.

REAL SKIN.
REAL **TRANSFORMATION**

SmoothGlo clinical cases have demonstrated visible improvements in tone, texture, fine lines, firmness, and overall skin appearance [1]

WHAT SHOULD I **EXPECT?**

SmoothGlo brings together three complementary technologies to address more than one aspect of **skin quality at once**

Step 1: Consultation
Your provider evaluates your skin, concerns, and goals and creates a SmoothGlo treatment plan tailored to you.

Step 3: Aftercare
Mild redness, swelling, warmth, or tightness may occur.
Temporary roughness or micro-crusting may appear during the first 24–48 hours after FibroBoost.

Step 2: Treatment
XPL is performed first, followed by FibroBoost.
You may feel warmth during XPL and a light stamping sensation during FibroBoost.
Topical numbing may be used for comfort..

Step 4: Your plan
Visible improvement can develop from the first treatment and continue to evolve as your skin renews. Your provider will recommend the number & spacing of treatments based on your skin & goals.

Warnings and risks:
SmoothGlo® is performed using the Stellar M22™ and triLIFT™ systems and is not suitable for everyone.
Ask your healthcare provider whether SmoothGlo® is right for you and about the benefits, risks, and reasons to avoid each part of your treatment.

Possible side effects include discomfort, redness, swelling, bruising, itching, dryness, changes in skin texture or color, and temporary roughness or crusting. Serious complications can occur. For example, bruising, burns, scarring, excessive swelling, scarring, fat loss, disfigurement, and nerve damage have been reported with certain uses of RF microneedling. Individual results vary.
